

500PPM SILVER CREAM

ALL-NATURAL ANTIMICROBIAL

A light all-natural antimicrobial cream blend for maximum topical nutrition and conditioning to support healthy, smooth, moisturized skin and strong, healthy nails.

1.7 oz net weight

Silver is a natural antimicrobial. It kills bacteria, viruses, fungi/yeasts, molds and protozoa parasites for optimal skin and nail condition.

Highest silver content available in an all-natural cream. Silver nanoparticles exceeding 500ppm of net weight. Not made using colloidal silver which cannot achieve this ppm.

This cream **absorbs into skin and nails** far better than gels.

Precaution: If you have a nail fungus, this product may kill it and could result in that portion of the nail loosening and coming off. With continued use, a nice-looking fortified nail will grow in.

Unscented and colorless.

USA origin all-natural ingredients with no GMO's, synthetics or colorants: *Water, Aloe Vera Juice, MSM, Rosehip Seed Oil, Kelp Extract, Neem Extract, Lanolin, Vegetable Glycerin, Bees Wax, Castor, Rosemary Extract, DL Panthenol, Wheat Germ Oil, Allantoin, Vegetable Stearic Acid, Emulsifying Wax, Silver Dihydrogen Citrate, Citric Acid and 500ppm Silver Nanoparticles (minimum per net weight).* **Ingredient details:**

MSM (Methylsulfonylmethane): Sulfur compound in our bodies, as well as in some plants. Enhance collagen bundles and keratin, the important stuff in our skin, hair and nails.

Neem: A traditional herb used to relieve skin conditions.

Lanolin (aka wool wax or wool grease): Wax secreted by the sebaceous glands of sheep.

Vegetable Glycerin (aka glycerol): Produced from plant oils, typically palm oil, soy, or coconut oil. Attracts moisture to the skin and enhances absorption of nutrients.

Castor: Vegetable oil pressed from castor beans included in creams as a moisturizer.

DL Panthenol (aka pantothenol): Alcohol analog of pantothenic acid (vitamin B5) and is thus a provitamin of B5. Used as a moisturizer and to relieve skin damage.

Allantoin: A major metabolic intermediate in most organisms including animals with many skin and nail benefits

Vegetable Stearic Acid: One of the most common saturated fatty acids found in nature.

This product is best kept at a comfortable indoor living temperature. To avoid deterioration or densification, don't let it get hot, like in a parked car on a sunny day. Also, don't store it frozen or refrigerated. The product shelf life far exceeds one year from the manufacturing date, which is the lot number on the label. If the product seems to have deteriorated due to storage conditions, replace it with new product.

"This product is not intended to treat, diagnose, cure or prevent any disease", according to the FDA.
