

500ppm Silver Nail Polish Clear Base Coat

15 ml

AntiMicrobial

Seven-Free Formula

Contains NO: DBP, xylene, toluene, camphor, parabens, formaldehyde or formaldehyde resin

Silver is a natural antimicrobial. It kills bacteria, viruses, fungi/yeasts, molds and protozoa parasites **for optimal nail condition.**

Highest silver content available in a nail polish.

Silver nanoparticles exceeding 500ppm (parts per million) of net weight.

Precaution: If you have a nail fungus, this product may kill it and could result in that portion of the nail loosening and coming off. With continued use, a nice-looking nail will grow in.

Goes on clear and thick without a high gloss.

Storage: This product is best kept at a comfortable indoor living temperature.

Keep away from children.

Product Safety Information: SilverNailPolish.com/MSDS.pdf
